

Battery Boost Micro-credentials

Designed to equip participants with industry-specific skills.

About Battery Boost Micro-credentials

Battery Boost Micro-credentials offers free, unpaid, short-term training sessions that provide hands-on skills for careers in the electric vehicle (EV) sector. This accessible program helps participants gain practical knowledge and enhance their employability in the growing EV market.

Program benefits:

- Quick way to enhance job qualifications.
- Helps professionals stay updated with industry trends.
- Provides an affordable alternative to traditional education.
- Recognized by employers for workforce development.

Ideal candidates:

- Are legally allowed to work full-time in Canada.
- Have at least 3 years of work experience (in any field).
- Recognize that all training will be conducted in English and have proficiency in the language.
- Are motivated to transition into technical roles in EV battery manufacturing.
