

Boost your EV Career with Battery Boost

Join our innovative training program designed to prepare you for a career as a technician in electric vehicle (EV) battery manufacturing.

PROGRAM HIGHLIGHTS

- **Hands-on-training:** Experience advanced Virtual Reality (VR) simulations replicating real-world equipment and manufacturing processes.
- **Paid training:** Earn hourly payments during the training period with opportunities for full-time employment upon successful completion.
- **Career support:** Receive job placement assistance if not directly hired after the program.

IDEAL CANDIDATES

- Minimum three years of work experience (in any field).
- Legally permitted to work full-time in Canada.
- Proficient in English.
- Motivated to transition into technical roles in EV battery manufacturing.

PROGRAM DURATION

- February 2025 to March 2026.
- Up to 11 cohorts, each with up to 50 participants.
- Each cohort is a duration of 4 weeks.

TECHNICAL TRAINING PROGRAM

FREQUENTLY ASKED QUESTIONS

What is the Battery Boost program?

An innovative training program funded by Upskill Canada [powered by Palette Skills] and the Government of Canada. Administered by Invest WindsorEssex with delivery support from NextStar Energy and program partner Virtualware.

What type of training can I expect?

Through advanced Virtual Reality (VR) simulations, participants gain hands-on, job-specific training that equips them with the skills needed to thrive in Canada's rapidly growing EV battery manufacturing sector.

What roles does the program prepare me for?

The program aims to help candidates secure a full-time technician role after successful completion of the program.

What if I don't have a technical background?

No problem! The program is designed for participants without prior technical experience but who are eager to learn.

Do I get paid during training?

Yes! Participants receive hourly payments during the program.

What if I do not successfully complete the program?

Participants who are admitted but do not successfully complete the program's requirements will have the opportunity for additional unpaid training to support a career in the EV supply chain. There are no direct costs to participate in the Battery Boost program.
